

PRESET PROGRAMMES AND DEDICATED PROGRAMMES

A unique feature to standardise the results of ULTRA cutters and combi-cutters.

AVAILABLE MODELS

* Ask for special versions availability

SALES DESCRIPTION

The ULTRA cutters have three preset programmes that can be configured and also allow the user to create up to 9 customised programmes. Thus, using a combination of different speeds and different times, the user always achieves the same result with autonomous operation.

- ✓ Preset programmes
Three preset programmes that can be customised, combining different speeds and times to achieve the same result automatically every time.
- ✓ **Put all the ingredients in the pot**, choose programme P1, P2 or P3 and let the machine work on its own.
- ✓ Programme 1 (P1): for a dense texture. See video.
- ✓ Programme 2 (P2): for a fine texture. See video.
- ✓ Programme 3 (P3): a pulse programme for a “chunky” texture. See video.
- ✓ Customisable programmes
9 fully customisable programmes: the user can combine different steps, different speeds and different times to **standardise their own recipes** and always obtain the same result automatically.
